

BENEFITS

The latest addition to the TECO Home Appliance product range is the vertical skinny window air conditioner. One of the most versatile air conditioners due to the ability to install it in a sliding window. The included window kit makes it simple to fit to most horizontal sliding windows (from 90 to 145cm in height). A great solution for temporary accommodation, renting or permanent housing.

Inverter Compressor

This assists with quieter operation and increased efficiency.

I Feel Mode

Turns off the temperature sensor on the air conditioner and uses the built-in sensor of the remote.

Self Clean Operation

Using high velocity air to blow away dust and contaminants from the fan coil.

Child Lock

Disables the control panel so buttons cannot be pressed by little fingers or by accident.

Wireless Remote

Along with a stylish touch control, this range comes complete with a wireless remote control

Window Installation Kit

Convenient and flexible window kit included to ensure a snug fit to most horizontal sliding windows.
